

Welcome to the Future

2021.AI is an ambitious next generation company delivering AI as a Service. We help organizations remove barriers and extract New Business Value with Artificial Intelligence (AI) and Machine Learning (ML).

It is not a secret anymore 2021.AI has launched the HOW agenda for AI

Today, only a few organizations unleash the full potential of data and use it intelligently to create measurable new Business Value. **2021.AI will change this through,**

Developing and defining an AI strategy and operating model to extract New Business Value with AI.

Offering our proprietary AI as a Service platform **INSIGHTS** to support the organization wide implementation of AI and ML.

Providing the required data engineering and data science competencies to support organizations to seamlessly build, deploy, and operate ML.

Our AI Advisory Services

AI Strategy

We offer AI strategy development and implementation to support the investments in AI.

AI Opportunity Identification

We identify, map and prioritize AI opportunities across the organization.

AI Use Case Generation

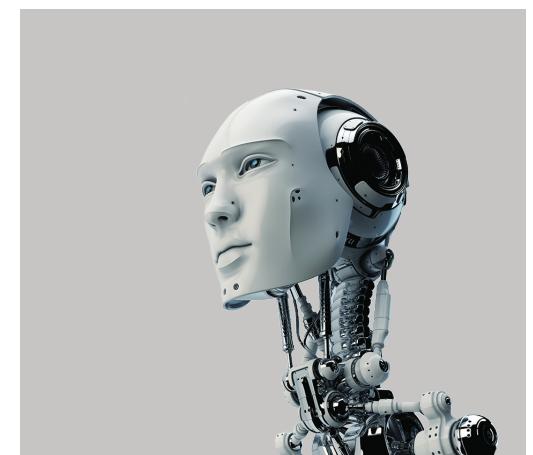

We assess an organization's data and technological maturity to determine what AI and ML use cases provide the highest new Business Value in relation to cost, complexity and time to execute.

AI Proof of Concept and Implementation

We produce AI and ML Proof of Concepts and take these into production through **INSIGHTS**.

INSIGHTS

We are building the most **intuitive** and **user-friendly** AI as a Service platform

INSIGHTS in its horizontal nature is offering to secure all data science activities as a core asset for any organization.

With its business agnostic nature, **INSIGHTS** enables any organization irrespective of size and sector access to quickly establish and operate ML and data science teams at any scale

INSIGHTS secures an organizations asset value from investments in advanced technology and mitigates the risk of people dependencies, by storing all ML and data science algorithm initiatives in one horizontal oriented platform.

INSIGHTS is a true Enterprise platform, auto-scaled, maintained, upgraded, backed-up fully and securely managed.

INSIGHTS deploys on Azure, the Google Cloud Platform, Amazon Web Services and on premises.
