

Welcome to the Future

2021.AI is an ambitious next generation company delivering AI as a service. We help organizations remove barriers to extract New Business Value with Artificial Intelligence (AI) and Machine Learning (ML).

It is not a secret anymore, 2021.AI has launched the HOW agenda for AI.

Today, only a few organizations unleash the full potential of data and use it intelligently to create measurable new Business Value. **2021.AI will change that**, by

Supporting organizations with an AI strategy and an operating model to extract new Business Value with AI and ML.

Offering our proprietary AI as a Service platform **INSIGHTS** to support all types of organizations in the organization wide implementation of AI and ML.

Provide the required data engineering and data science competencies to support organizations to seamlessly build, deploy, and operate machine learning.

INSIGHTS is a horizontal platform and easily integrates into an organizations existing technology stack to becomes a core company asset.

Our AI Advisory Services

AI Strategy

2021.AI provides an AI strategy and implementation roadmap to Executive Management and support the organization's investments in AI and ML.

AI Opportunity Identification

We identify, map and prioritize AI opportunities by combining in-house business, 2021.AI ML and data science expertise.

Use case generation

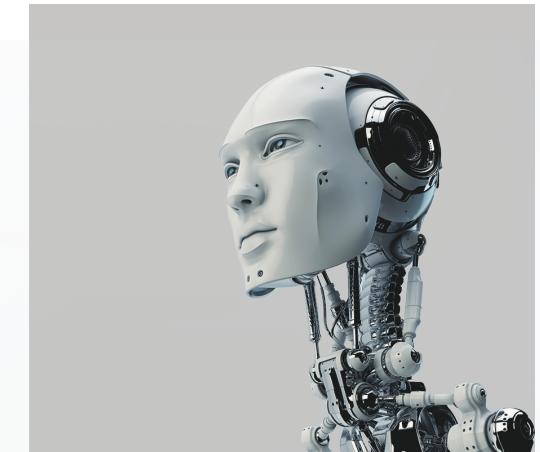

We assess an organization's data and technological maturity to determine what AI and ML use cases provide the highest new Business Value in relation to cost, complexity and time to execute.

Proof of Concept and implementation

We produce AI and ML Proof Of Concepts and take these into production on our AI as a Service platform **INSIGHTS** with our clients.

INSIGHTS

We are building the most **intuitive** and **user-friendly** AI as a Service platform.

With its business agnostic nature, **INSIGHTS** enables any organization irrespective of size and sector access to easily establish and operate ML and data science teams at any scale.

INSIGHTS secures an organizations asset value from investments in advanced technology. It mitigates the risk of people dependencies, by storing all ML and data science algorithm initiatives in one horizontal oriented platform.

INSIGHTS is designed for the full spectral of data science roles, irrespective of their experience level. Data scientists can work via their preferred user interfaces,

- Drag and Drop
- Notebook
- Open Work Spaces
